Sana Alliance

Every heart tells a story.

Every heartbeat counts. We make it visible.

Holter ECG in Switzerland. Two solutions for primary care practices, cardiology providers and hospitals.

Small device, more freedom

The C3w combines freedom of movement with continuous ECG recording.

Waterproof

Showering in daily life: the C3w is IP67 waterproof.*

Wireless

No cables getting in the way. For freedom of movement every day.

Up to 14 days

Up to 14 days of continuous ECG recording on a single charge.

Easy to apply

Three standard electrodes and intuitive patient configuration.

Light and discreet

Just 36 grams. Compact and comfortable to wear every day.

3-channel ECG

Three channels provide the foundation for detailed ECG analysis.

Certified quality

C3w: Class IIa medical device under the MDR.
ISO 13485: quality management system.

CE 0123 TÜV SÜD ISO 13485

* Use and water contact according to the instructions for use.

Two solutions, one clear path.

Choose the workflow that fits your organisation.

01

Primary care practice

Holter ECG in your practice, with personal implementation support and training.

External cardiology interpretation by Swiss FMH cardiologists.

Bill services performed by your practice within the applicable tariff framework.

Expand your diagnostic offering

02

Cardiology & hospital

The Cortrium solution saves time on preparing your Holter data for review.

Final clinical interpretation and diagnosis by your in-house cardiologists.

Sana Alliance finds the right service model for your organisation.

More room for clinical decisions

Technology supports and people decide

Algorithmic pre-analysis is followed by review and preparation by a team of more than 40 ECG specialists. Final clinical interpretation then takes place within the responsible cardiology team, at Sana Alliance or in your organisation.

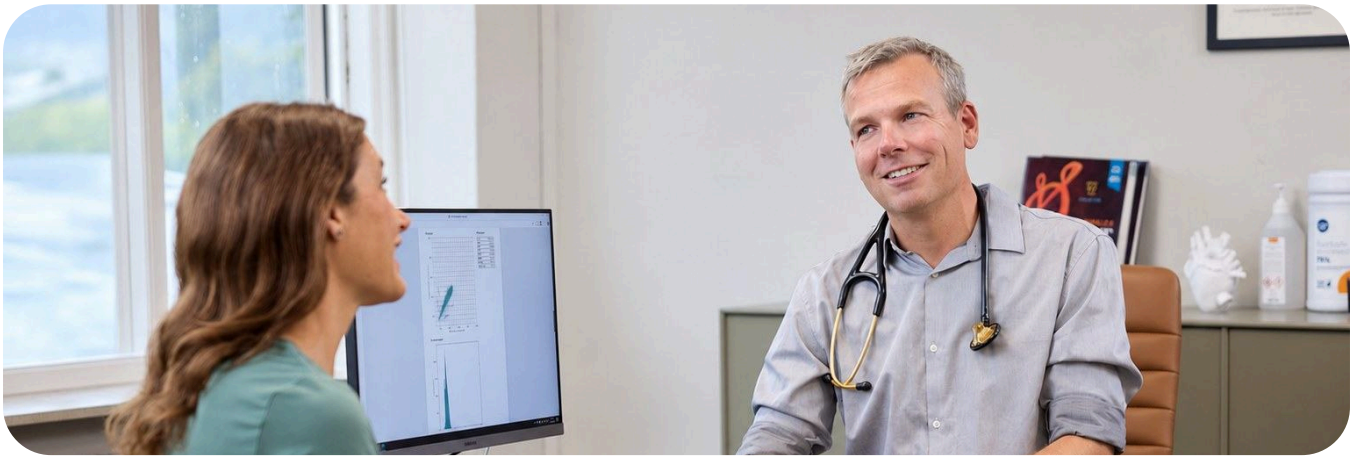

FOR PRIMARY CARE PRACTICES

Your primary care practice as the central hub for cardiac care.

You perform Holter ECG recording in your primary care practice, while Sana Alliance provides cardiology interpretation.

Expand diagnostics and strengthen practice value

Holter ECG in your practice broadens your diagnostic offering. Services performed by your practice may be billed within the applicable tariff and contractual requirements.

Algorithmic pre-analysis of the ECG recording.

More than 40 ECG specialists for review and data preparation.

Final clinical interpretation by Swiss FMH cardiologists.

Indication, performance, billing and subsequent care are subject to applicable professional, tariff and contractual requirements.

FOR PRIMARY CARE PRACTICES

It’s this simple

From application to report:
four clear steps for your practice.

01

Apply the device

The practice checks the indication, informs the patient and applies the wireless, waterproof C3w Holter monitor.

02

Wear it in daily life

The C3w records the ECG for the agreed duration, up to 14 days. The device is then returned to the practice.

03

Professional interpretation

Algorithms pre-analyse the ECG. More than 40 ECG specialists review and prepare the data. Swiss FMH cardiologists produce the report.

04

Receive the report

The report is sent to your practice. You discuss the results and coordinate further assessment when needed.

Your practice guides the Holter process,
Sana Alliance interprets.

FOR CARDIOLOGY & HOSPITALS

A heart provides data. We make it understandable.

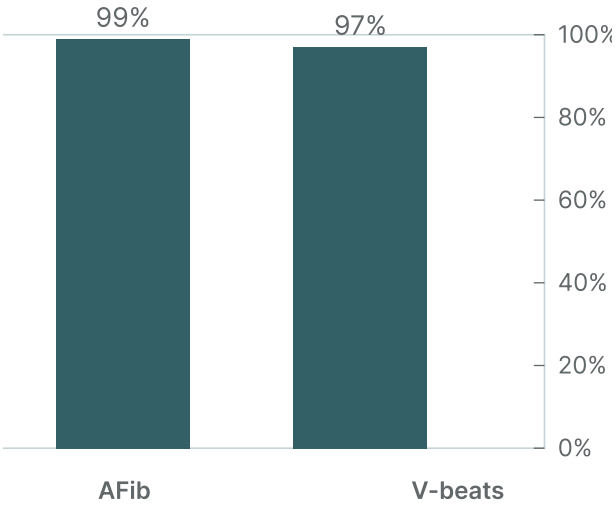

We prepare your Holter data so you can focus on final clinical interpretation.

Less preparation and more time for your expertise

Algorithmic pre-analysis is followed by review and preparation by a team of more than 40 ECG specialists. Your cardiology team remains responsible for final interpretation and diagnosis.

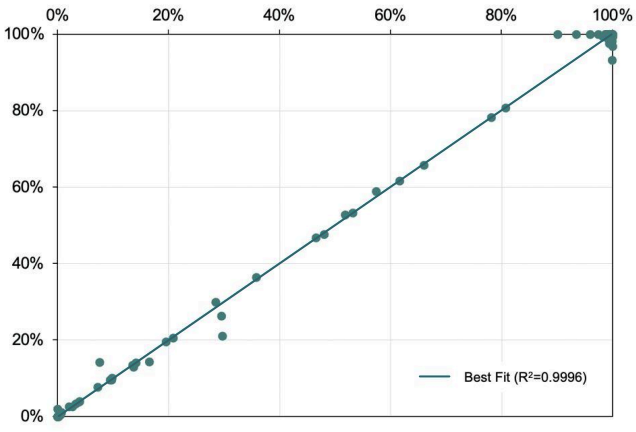

Quality that builds confidence

High sensitivity in rhythm detection

Sensitivity based on an externally validated, annotated database by internationally recognised certified cardiac technicians. n = 300 patients

Agreement in AF burden measurement

Analysed by a recognised NHS supplier (third party)

Correlation in a comparative study with an external ECG analysis service considered the gold standard (R^2=0.9996) = 379 patients

FOR CARDIOLOGY & HOSPITALS

From raw signal to final physician interpretation

Four clear steps. Final clinical interpretation remains in your organisation.

01

Record

The ECG is recorded with the comfortable, wireless and waterproof C3w Holter monitor while patients continue their usual daily activities.

02

Transfer

After the device is returned, the ECG recording is transferred through the agreed secure process and made available for pre-analysis.

03

Pre-analysis and expert review

Algorithms pre-analyse the ECG. More than 40 ECG specialists review the results and prepare the data for your cardiology team.

04

Interpret

Your cardiology team reviews the prepared data, interprets the results in their clinical context and produces the final medical report.

Structured data and clinical expertise enable informed decisions.

Sana Alliance

Your questions and our personal commitment.

Together, we find the right Holter solution for your practice or organisation. Personal, clear and grounded in your daily work.
